DETAILED ACTION

Response to Amendment

1. The applicant's amendments, filed 5/15/2006, have been fully considered and reviewed by the examiner. The examiner notes the amendments to claims 19, 22-23, 25-26, 28, and 32. Claims 8-13 and 18-42 remain pending.

Response to Arguments

2. Applicant's arguments with respect to claims have been considered but are moot because the arguments are directed to newly added limitations that were not present at time of rejection and are discussed in a new ground(s) of rejection below.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 19-22 and 26-38 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The examiner has reviewed the disclosure as originally filed and the examiner can not locate support for the added limitations relating to pressure "substantially greater than one atmosphere". The disclosure has not

Art Unit: 1762

described a pressure that is substantially greater than one atmosphere and also has not disclosed the metes and bounds of such a pressure.

Allowable Subject Matter

5. Claims 8-13, 18, 23-25, and 39-42 allowed.
6. The following is a statement of reasons for the indication of allowable subject matter:

Claims 8-13, 18, and 39-42: These claims are allowable for the reasons set forth in the office action dated 9/14/2005.

Claim 23: None of the prior art cited or reviewed by the examiner teaches pushing a chemical out of a tube by using an inert gas and then subsequently separating the liquid chemical and the inert gas using a hydrophobic membrane.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1762

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
